

MOTUPALLY SRIKAR

Hyderabad, Telangana | +91 8688064530 | motupallysrikar@gmail.com | [LinkedIn](#)

SUMMARY

Computer Science (AI & ML) graduate with strong hands-on experience in machine learning, deep learning, secure systems, and backend development. Proficient in **Python, SQL, TensorFlow, PyTorch, Scikit-learn, FastAPI, AWS, NLP, MySQL, Git**, and cloud technologies with a proven ability to design and deliver end-to-end AI-powered and data-driven solutions. Adept at translating complex academic and personal projects into scalable, real-world applications. Eager to contribute in a software developer role within a collaborative, fast-paced engineering team.

EDUCATION

Guru Nanak Institute of Technology

Bachelor of Technology – Computer Science (AI & ML)

2025

Hyderabad, Telangana

PROJECTS

AI-Based Text-to-Image Generation System

[GitHub](#)

- Built a text-to-image generation model using Stable Diffusion, overcoming limitations of traditional GAN and VAE architectures such as mode collapse and limited diversity.
- Fine-tuned on pre-trained datasets to improve output quality and contextual relevance.
- Implemented text encoding and noise-to-image diffusion pipelines to produce high-quality, semantically accurate images.
- Deployed the system via a web interface/API for real-time image generation from user-provided text prompts.
- Evaluated model output using qualitative and quantitative metrics, achieving visually diverse results superior to GAN-only methods.

Anti-Cheat Detection Engine

[GitHub](#)

- Built a real-time anti-cheat detection platform using FastAPI and machine learning techniques to analyze player telemetry data and identify suspicious behavioral patterns across multiple gaming sessions.
- Developed anomaly detection and confidence-scoring mechanisms to track player activity, flag potential cheaters, and automate verdict generation through a scalable API-driven architecture.
- Designed an interactive dashboard with HTML, CSS, and JavaScript to visualize player statistics, suspicion progress, session history, and detection outcomes, enabling real-time monitoring and analysis.

HomeWorth AI – House Price Prediction System

[GitHub](#)

- Built a machine learning-powered web application to predict residential property prices using features such as bedrooms, bathrooms, living area, floors, waterfront access, and property condition.
- Developed a RESTful backend using FastAPI, trained and deployed a Scikit-learn regression model, and implemented data preprocessing and feature scaling for accurate predictions.
- Designed a responsive frontend using HTML, CSS, and JavaScript, enabling users to input property details and receive real-time price estimates through API integration.
- Leveraged Python, FastAPI, Scikit-learn, Pandas, NumPy, Joblib, HTML, CSS, JavaScript, Git, and GitHub to build and deploy a complete end-to-end machine learning solution.

ACTIVITIES

AI & ML Club – Guru Nanak Institute of Technology *Active Member*

- Participated in weekly study circles focused on computer vision, NLP, and reinforcement learning; presented a session on diffusion models and their advantages over GANs.
- Collaborated with peers on inter-college hackathons, contributing ML model design and API integration to team projects.

Open Source Contributor

- Contributed to open-source Python and ML repositories on GitHub, including bug fixes, documentation improvements, and minor feature additions.
- Maintained personal GitHub with 3+ end-to-end project repositories, each with detailed READMEs and usage guides for community reference.

ADDITIONAL

Technical Skills: Python, SQL, TensorFlow, PyTorch, Stable Diffusion, GANs, Scikit-learn, NLP, ML Pipelines, Pandas, NumPy, FastAPI.

Certifications: Deloitte Australia – Data Analytics Job Simulation | IBM Data Science 101 | Qualcomm AI & Machine Learning Foundations | AWS APAC Solutions Architecture Virtual Experience Program | Accenture North America Project Management Job Simulation | Python Fundamentals for Beginners

Areas of Interest: Artificial Intelligence, Machine Learning, Deep Learning, Cloud Computing, Secure Systems, Backend Development
